A5000 2Mb RAM Upgrade
Installation Guide

INVENTORY

Your HCCS A5000 2Mb RAM Upgrade contains the following items;

- A5000 2Mb RAM PCB
- Molex jumper link

WARNING!

To the User

The installation of the HCCS A5000 2Mb RAM Upgrade should only be carried out by an authorised dealer or the warranty on this product may become void.

To the Dealer

This upgrade incorporates static sensitive devices and should be handled in a static free, earthed environment. Failure to do so will void the warranty of the upgrade.

DANGER

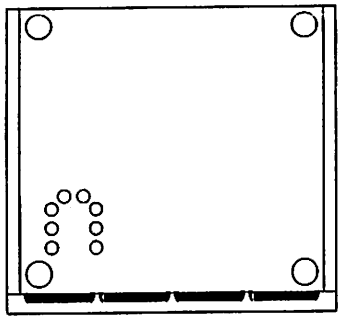
Remove the computer from the mains supply before attempting to remove the lid.

Installation

REMOVING THE LID

Remove all signal cables from the computer and turn it over onto a soft surface. Locate the six screws on the base of the machine and remove them using a philips screwdriver. See figure 1. Turn the computer back over. To remove the lid gently slide it back until it is free from the body of the machine.

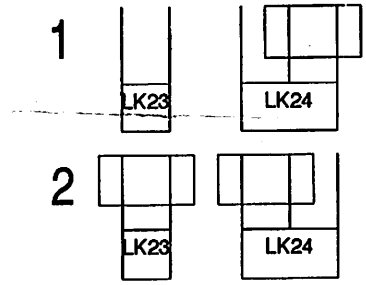
figure 1



INSERTING THE UPGRADE

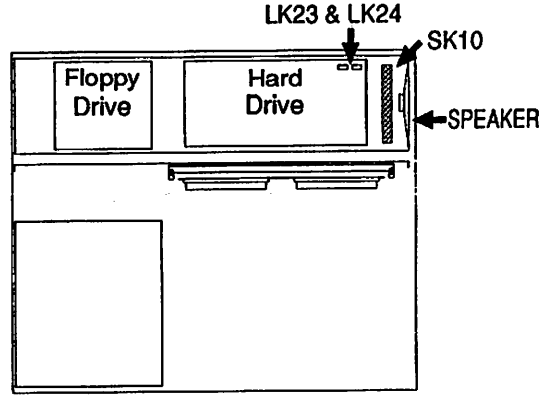
Lift the lid clear and orientate the machine so that the rear face is towards you. Locate the two sets of links on the edge of the PCB almost under the hard drive assembly, LK23 and LK24, as shown in figure 2. If it has not already been done move the link on LK24 so that it is in the nearest position to LK23. Place the link provided with this Upgrade on the vacant pins of LK23. See figure 2.

figure 2



Locate the female connector marked SK10 on the PCB (See figure 3). Insert the upgrade board so that it sits vertically in the machine with its components facing the rear side of the speaker and its connector in SK10. This connector keyed and so can not be inserted the wrong way round.

figure 3



The upgrading is completed by replacing the lid of the machine and connecting all signal/power leads.

TESTING

To test whether upgrading has been successful switch the machine on and the 4096K legend should appear. If there is a solid red screen after this, then there is a fault and further assistance should be saught. If all is well the machine will initialise and go into DeskTop.
